

Associate Scientist – Neuroscience

BioLegend develops world-class, cutting-edge antibodies and reagents for biomedical research, manufactured in our state-of-the-art facility in San Diego, CA. Our product areas include cell immunophenotyping, cytokines and chemokines, adhesion, cancer research, T-regulatory cells, stem cells, innate immunity, cell-cycle analysis, apoptosis, and modification-specific antibodies.

Job Summary

BioLegend is growing with the addition of a new Neuroscience research product line. This position will be at the Boston, MA location. We are seeking a highly motivated candidate to join the Neuroscience Product Development unit. The primary responsibility of the incumbent will be to execute the research plan of a Parkinson's disease project that has been funded by a well-known non-profit organization. The candidate will support the development, optimization and validation of immunoassays. In addition, the successful candidate will contribute to new product development efforts in support of the company's growing portfolio in the area of Neurodegenerative disease.

Essential Functions

- Develop and validate immunoassays / ELISA and perform sample testing
- Directly coordinate with development collaborators
- Manage component materials and document all data, analysis and reports.
- Present data to team members and/or collaborators
- Support new product development and product QC testing

Qualifications

Minimum Education (or substitute experience) required: B.S. or M.S. degree in Biology, Biochemistry, Molecular Biology or related field.

Minimum Experience required: B.S. degree with 3-5 years or M.S. with 1-2 years of industrial experience with ELISA assay development, Western blot and other immunoassays.

Skills Required: Must exhibit sound scientific approach to experimental design and interpretation and be able to demonstrate strong organizational, written and communication skills with the ability to present findings in a group. Experience working in GLP or GMP environment is required. Experience with other assay platforms is desired.

Job Location: Dedham, MA
