

Research Associate I – Product Development

BioLegend develops world-class, cutting-edge antibodies and reagents for biomedical research, manufactured in our state-of-the-art facility in San Diego, CA. Our product areas include cell immunophenotyping, cytokines and chemokines, adhesion, cancer research, T-regulatory cells, stem cells, innate immunity, cell-cycle analysis, apoptosis, and modification-specific antibodies.

Job Summary

BioLegend is growing with the addition of a new Neuroscience research product line. This position will be at the Boston, MA location. The primary responsibility of the incumbent will be performing and documenting western blot and immunohistochemistry quality control experiments on antibody products & detection reagents according to established SOPs and GMP regulations. The candidate will support the evaluation and development of new products in the pipeline. In addition, the candidate will coordinate testing and release of products with the scientific and manufacturing teams and perform routine lab jobs, as required.

Essential Functions

- Perform and document QC experiments in support of the current product line
- Conduct evaluation experiments in support of new product development
- Log in and order lab supplies and reagents
- Complete other lab duties and cross train on various lab jobs, as needed

Qualifications

Minimum Education (or substitute experience) required: B.S. degree in Biology, Biochemistry, Molecular Biology or related field.

Minimum Experience required: 2+ years experience working in a lab environment in academia or industry and working experience with Western Blot and Immunohistochemistry is preferred. Experience in a regulated environment (gMP/gLP) is preferable but not required.

Skills Required: Must have MS Office and database applications skills, strong attention to detail, and excellent time management and organizational skills. Must be self motivated, able to work independently and as part of a team.

Job Location: Dedham, MA
