

## **Postdoctoral Fellow Joslin Diabetes Center**

The Serwold lab at the Joslin Diabetes Center has an opening for a postdoctoral fellow. The overall focus of the lab is on T cell development, especially in regards to the development of autoimmune T cells.

Job Description: The current open position will focus on the tracking autoimmune T cell responses in type 1 diabetes, and on applying novel methods of cell-mediated tolerance induction. Expertise in immunology and molecular and cell biology would be most beneficial.

Email a cover letter and cv to [Thomas Serwold](mailto:Thomas.Serwold@joslin.harvard.edu).
