

## Scientist II, ImmunoOncology

**The Oncology Biologics department at AbbVie in Redwood City, CA is seeking a highly motivated and experienced Scientist to join the Immuno-Oncology team**

### Key Responsibilities:

- Establish relevant in vitro assays, identify and validate potential biomarkers in pre-clinical animal samples, and conduct studies to provide the rationale for a development path
- Work independently on the design, execution and interpretation of experimental results
- Maintain accurate and timely records of experimental designs, assay development, experimental results and data analysis
- Present results at internal meetings
- Work as part of a broader, highly collaborative interdisciplinary team in a fast paced research laboratory
- Critically evaluate relevant scientific literature and adopt novel technologies to facilitate research

### Qualifications

- Masters Degree or Bachelors Degree in Immunology, Biology, Biochemistry or closely related field with 5+ years (MS) or 7+ years (BS) of relevant experience in an academic and/or industry setting evaluating protein therapeutics (in vitro and ex vivo)
- Proficiency with a wide range of laboratory techniques, especially mammalian cell culture, cell transfection, immunoassays (ELISA, MLR, proliferation, cytotoxicity assays, Luminex, etc.), cellular functional assays (luminescence), flow cytometry, experimental planning, analysis and data interpretation

### Job Location: Redwood City, CA

You may submit resume directly to Fiona Harding by e-mail ([Fiona.harding@abbvie.com](mailto:Fiona.harding@abbvie.com)) and apply online to the following website :<https://abbvie.taleo.net/careersection/2/jobdetail.ftl?job=15000000OV&lang=en>

AbbVie (NYSE:ABBV) is a global, research-based biopharmaceutical company formed in 2013 following separation from Abbott Laboratories. The company's mission is to use its expertise, dedicated people and unique approach to innovation to develop and market advanced therapies that address some of the world's most complex and serious diseases.

AbbVie Biotherapeutics (ABR) in Redwood City, CA is an independently-governed biotech arm of the parent company, AbbVie, Inc. (North Chicago, IL). The mission of ABR is to develop innovative biologic therapeutics in areas of unmet medical need, specifically in Oncology. ABR employs approximately 125 individuals with a strong focus on forward-thinking Discovery, R&D and Regulatory / Marketing strategies. Our size and energetic teams allow for effective cross-functional collaboration, agility and critical thinking / decision-making.
