

Yale SCHOOL OF MEDICINE

Postdoctoral Position in B Cell Memory

A postdoctoral position newly funded by the NIH is available to study critical events in memory B and plasma cell formation and maintenance. Study a novel pathway required for establishment of B cell memory and elucidate the specific mechanisms by which it regulates memory formation, maintenance and self-renewal.

Join a young lab, dive into a well-delineated, promising project and shape independent future directions. Required are a Ph.D. in immunology or a related field and expertise in flow cytometry, cellular immunology and molecular biology techniques. The ideal candidate will be self-motivated, detail-oriented and energetic scientist and a thoughtful, team-spirited teacher for junior lab members. The desire to take advantage of the world-class colleagues and resources that Yale University offers is a plus.
